

2017

For any weather.  
Since 1928.

# 811.X1

The very light X1 is a winner of the Design Award and is the smallest patented umbrella from Knirps. It has a medium canopy and, thanks to the attractive cover, has a beautiful form even when closed. Thanks to its soft case, it can be placed wet in any bag without being a danger to its contents.

DESIGN AWARD  
WINNER

XS

Easy handling thanks to pushbutton runner

Extremely light-weight fabric made of fine yarn  
for a slim pack size

Extremely lightweight due  
to aluminum

Umbrella case has a loop to attach  
it to a briefcase or a backpack

**Windproof**  
To avoid damage to the umbrella, the canopy folds over during unfavorable weather conditions, without breaking the ribs.  
Knirps umbrellas which are marked with this icon are equipped with highly flexible ribs.

**Handling Duomatic Umbrella**  
Push the button, close the umbrella and open it up again. The canopy opens as usual and protects you reliably from rain.

Handling Manual Umbrella:  
Pull the runner downwards and the canopy will automatically fold back into the correct position, leaving the umbrella ready for use during the next rain shower.

**Wind Tunnel Testing**  
Knirps products are wind tunnel tested on a regular basis to check their sturdiness.

**Premium Quality Components**  
The models are equipped with high quality components:  
- Air craft quality aluminum, which has thicker wall strength, is light, robust and stainless.  
- Special coating to accelerate the drying of the fabric.  
- Recycled plastics are avoided to ensure a long service life of the products.

**Eco**  
Canopy fabric complies with Oekotex® Standard 100.

SHORT AND  
SWEET.

### TRADITION

The Knirps story started in 1928 with a revolutionary idea: the invention of the first collapsible umbrella frame. Knirps was born and the 89-year-old success story began. The innovative pocket umbrella triumphed due to the outstanding quality of the products and the continuing development of the range of models with different sizes, shapes and colours – as well as garden umbrellas.. Through this unique combination of innovation, design and quality, Knirps has achieved a rare status: It is synonymous with the world's leading pocket umbrellas.

### QUALITY

Each Knirps is imbued with the experience from 85 years of umbrella innovation and manufacturing. High-quality materials, attention to detail and rigorous quality control are part of our company philosophy. For this reason, our umbrellas undergo rigorous testing procedures, including wind tunnel testing and are laboratory tested for corrosion resistance. These successful tests demonstrate that our products can be used in the worst weather conditions and maintain a long life.

### INNOVATION

The success of the Knirps brand is based on the historical innovative strength which customers still depend on today. In order to continue to earn this trust, we will continue to invest all of our enthusiasm, experience and engineering expertise in technically ambitious products.

### PERFECTION

For Knirps, perfection means providing our customers with a product that demonstrates its usefulness day after day, in accordance with our high standards in design, function, materials and quality workmanship. After all, every Knirps is a representative of the brand.

### SUSTAINABILITY

Knirps is committed to environmental responsibility by creating quality products that last for many years and by conducting repairs through specialty retailers or repair persons. This ensures that our umbrellas are not simply discarded and replaced by a new product.
